Creditron Corporate Overview

Creditron is a leader in delivering payment processing and receivables automation solutions to government entities, utilities, insurance companies, lockbox providers, financial institutions, newspapers, publishers and non-profit organizations across North America by providing feature-rich, image-based solutions that reduce operation costs and complexity while enhancing customer service and corporate agility—translating into significant ROI.

For over 30 years of doing business, Creditron has grown both organically and by acquisition since its inception in 1994. Creditron has since firmly established itself as a leader in the receivables payment industry. Through a series of unique product innovations, the Creditron team has helped deploy hundreds of Lockbox, Cashiering, Remittance and imaging systems.

Creditron has extensive expertise and experience in developing, deploying and supporting mission-critical payment and receivables automation solutions, including remittance processing, lockbox processing, receivables automation, remote capture, cashiering/walk-up payment and electronic bill presentment and payment (EBPP). Our solutions leverage advanced imaging, data recognition and workflow technologies.

Creditron offers robust image-enabled payment processing and receivables automation solutions that benefit organizations of all sizes, across many industries. All of our solutions are designed to help clients save time and money, enhance customer relationships and market share, increase revenues, streamline compliance, audit and control and position them for success in the emerging electronic

"Since implementing Creditron software, we have streamlined our workflows and have saved many hours in labor to be used in other areas!"
